

Title: Civil Engineer
Location: Brighton

About the role:

We are looking for a Civil Engineer to join a growing design consultancy and provide ongoing technical design support to a range of clients in the UK with ongoing work available and excellent development opportunities for the right individual.

As a Civil Engineer, you will be working on a range of residential, commercial and education projects and should be able to demonstrate experience in completing design on projects in these sectors. You will be undertaking technical and feasibility strategies and studies, completing flood risk assessments, writing reports and drawing up plans and details. Experience with SuDS designs is a core part of the role, and completion of designs to mitigate flood risk and water quality issues will be essential in the position. You should have experience developing detailed designs from concept through to construction to comply with relevant regulations, best practices and guidance.

Within the role of a Civil Engineer, it will be essential for the chosen individual to complete accurate reports and designs, and your input and contribution to the team are viewed as essential in the continued development of the business.

About you:

Candidates should have a minimum of 2 years of experience working for UK-based design consultancies, and a background working on similar projects is desired in order to ensure a close match to the existing and upcoming workload.

In addition to having a confident, commercial and professional outlook you should have:

- Degree in Civil Engineering
- Minimum of 2 years of UK-based experience
- Experience working with drainage design and flood risk assessments
- Strength in working to appropriate agreement sections - S38, S278, S104, S106
- Strong analytical, communication and technical design skills
- Excellent communication skills in both written and spoken English

Software required:

- AutoCAD
- MicroDrainage/WinDes
- Civils 3D
- Microsoft Office suite

About the business:

The company are an established design consultancy who have been working on UK-based projects for the last 40 years and has built up a reputation for working on projects to a high level of detail and client satisfaction. This is an excellent opportunity to join their Brighton office where their team continues to go from strength to strength and provide excellent design engineering services to their UK-based clients.

With a portfolio that includes residential, commercial and education projects of varying value and complexity, they have a wealth of experience and some exciting future projects that have led to them requiring another skilled and eager individual to join them as part of their business development.

Benefits package:

- Company pension
- 28 days holiday including Bank Holidays
- 1 Friday off every per 4 weeks in addition to holiday
- Hybrid working
- Healthcare plan
- Ride to Work scheme (and bike storage facilities onsite)
- Showering facilities on site
